

# Assignment 6 - Web page

due at 23:59 on Tue Apr 19 (50 points)

For this assignment, you should create a small hand-coded HTML web page, as demonstrated in class and in [the notes](#). The page can be about anything you want, but it must include:

- Your name (you may substitute a pseudonym if you tell me what it is)
- At least one image
- At least one hyperlink
- At least one list (ordered or unordered)

Name your HTML file using your last-dash-first name, in lowercase with no spaces, such as `league-chris.html`. If you use an image that is not already on the Internet, you should rename it to contain your last name, such as `league-headshot.jpg`.

Upload your `.html` file along with any images or other files it needs to the dropbox at <https://www.dropbox.com/request/iFFOfekBkOQB1lWKMxpS>.
