Assignment 6 - Web page

due at 23:59 on Tue Apr 18 (50 points)

For this assignment, you should create a small hand-coded HTML web page, as demonstrated in class and in the notes. The page can be about anything you want, but it must include:

- Your name (you may substitute a pseudonym if you tell me what it is)
- At least one image
- At least one hyperlink
- At least one list (ordered or unordered)

Name your HTML file using your last-dash-first name, in lowercase with no spaces, such as `league-chris.html`. If you use an image that is not already on the Internet, you should rename it to contain your last name, such as `league-headshot.jpg`.

Here are some short instructional videos to help you get started and to submit your work to the web server:

- Getting started using Notepad on Windows [5:26]
- Getting started using TextEdit on Mac [8:13]
- How to submit (either platform) [4:56]

Here are links and other info you need to check the submission:

- Web server home page: http://cs101.liucs.net/
- Webmin upload tool: https://cs101.liucs.net:10000/
- Webmin user name: `cs101`
- Webmin password: should be in your email
- Upload/download tool is within "Other" in the left sidebar
- Directory to upload to: `/var/www/html`
