Milestone 2

Sun Oct 9 (150 points)

1. Choose platform/library/language

2. Create "Hello world" style application for that platform

3. Upload source and build configuration to gitlab

4. Choose ONE non-trivial feature from your requirements, and show some progress on implementation of that feature.

   Examples:

- User registration page
- Google API authentication
- Showing grid of dates/times

   Please complete this pre-check survey by noon on Monday October 3rd.
