

Milestone 5

Tue Apr 17 (150 points)

Implement an ordering or filtering functionality on the main ResultList page.

- Sort by distance from given location (use [Haversine distance formula](#))
- Sort by star rating
- Filter by tags (type and mood) using a dropdown to select from all available tags in the sample data.
- Filter by price range (set a max price, min? price)
- General search box

Other ideas:

- Google reviews?
- Touch authentication
